

# Data mining in **unusual domains** with information-rich **knowledge graph** **construction, inference** and **search**

Mayank Kejriwal, Pedro Szekely  
*Information Sciences Institute,  
USC Viterbi School of Engineering*

# Agenda

- Knowledge graphs
- Knowledge graph construction (KGC) over Web data
- What is an unusual domain?
  - Case studies of unusual domains
- Data mining in unusual domains
  - Why do knowledge graphs help?
- KGC for unusual domains
  - Information extraction for text
  - Information extraction for Web
- Knowledge graph inference: entity linking and resolution
- Practical Implementations
- Knowledge graph embeddings
- Answering complex queries over noisy knowledge graphs
